Dear Friends,

We are pleased and honored to report that the Fourth Edition of IFODS will be held **in Paris from 13-15 October 2021**. The Third Edition was a tremendous success, with over 210 participants in attendance and 450 in virtual. The quality talks and sessions have received such positive feedback across the board that we have decided to go ahead with our plans to create a major national oncology conference, in close collaboration with national oncology societies and leading international experts.

Meanwhile, we must continue to promote this conference to grow attendance year on year and to provide sustained excellence in oncology training. This is why we are moving the event to a more central and accessible location in Paris. This venue is even more conducive to dialogue and communication, everything being on the same floor, whether it be the central forum where partners and participants can interact, the meeting rooms all around, or the auditorium for plenary sessions.

We are looking forward to welcoming you at the **Rive Montparnasse** business center, which is very close to Montparnasse train station.

As in previous editions, the French Cancer Society (SFC) is working alongside IFODS to organize a special opening session on the **Future of Oncology**, with contributions from scientists and young oncologists. Institution like EACR is also expected to provide renewed support.

IFODS seeks to promote the efforts of all who fight against cancer, by sharing the best and latest developments in oncology as well as best practice guidelines. In line with this objective, IFODS is delighted to welcome patients and patient groups to its Science Committee meetings and to a number of sessions. The conference will provide these honored guests with opportunities to learn about therapeutic approaches and to confer with healthcare providers.

France is a key player within the global field of oncology and, as such, deserves a world-leading conference on a par with its excellent level of care.

Please join us in Paris from **13-15 October 2021**, for the Fourth Edition of IFODS. As always, pride of place will go to training, dialogue, sharing and excellence in science, in a warm and friendly environment.

Thank you in advance for your support and participation.

We hope to see you there!

With kind regards,

Jean-Philippe SPANO
President of the IFODS Science Committee
